

True Labs for Cannabis LLC is among the first analytical testing labs in New Jersey, and the only certified woman-owned cannabis testing lab on the East Coast. Our scientific leadership team has over 24 years of cannabis testing experience coming from 5 different United States cannabis markets. Founded by a successful business executive and mother with a passion for product safety and transparency, True Labs has an unwavering commitment to customer experience and integrity.

True Labs operates from an intentionally designed 5,000 square foot state of the art laboratory in East Hanover, NJ. We are proud members of the New Jersey CannaBusiness Association (NJCBA) and started the Laboratory Testing Committee within the Association to advocate for best practices and safety in the Garden State's emerging cannabis industry.

Verified. Reliable. Safe.

True Labs is providing transparency, ensuring quality, and enabling trust in cannabis.
